

AQUACRETE

PRODUCT DESCRIPTION

AquaCrete is a cement and quartz based lining with colour, developed specifically for use in swimming pools, fountains, bodies of water and basins. It is 2 to 3 mm thick and the finish is similar to MicroConcrete.

It can be combined with MicroCement and MicroConcrete to achieve continuous surfaces and can be used on new or existing swimming pools allowing for quick renovation.

APPLICATIONS & BENEFITS

- Can be applied on existing cement surfaces and tiles
- Suitable for swimming pools and freshwater features
- Perfect for public or private areas
- Can be polished in order to restore the surface
