

ENVIRONMENTAL POLICY

Living Concrete specialises in supplying and installation of bespoke concrete panels, tiles, coatings, furniture and lighting. The management and all who work at Living Concrete Limited are committed to the care of the environment and the prevention of pollution.

The organisation ensures that all its activities are carried out in conformance with the relevant environmental legislation and other requirements relating to the environment which apply to Living Concrete Limited.

Living Concrete Limited seeks to promote the use of environmentally responsible raw materials and products associated with the production of concrete products.

We are also keen to prevent pollution, minimise waste arising, promote recycling, reduce energy consumption, reduce harmful emissions and, where possible, to work with suppliers and subcontractors who themselves have sound environmental policies.

An essential feature of the environmental management system is a commitment to improving environmental performance. This is achieved by setting annual environmental improvement objectives and targets which are regularly monitored and reviewed. The objectives and targets are publicised throughout the organisation and all staff are committed to their achievement.

In order to ensure the achievement of the above commitments, the organisation has implemented an environmental management system which satisfies the requirements of BS EN ISO 14001:2004.

This Policy and the obligations and responsibilities required by the environmental management system have been communicated to all employees and persons working on behalf of the organisation.

The Policy is available to the public on request.
